

PE ORANGE COUNTY SECTION

CG PROFESSIONAL ENGINEERS IN CALIFORNIA GOVERNMENT

SECTION DELEGATE

Amir Baum

Associate Safety Engineer
Department of Industrial Relations, Cal/OSHA
Year of State Service: 2.5 years

I have been an active member of PEEG for Unit 9 for a good 2 years now, almost as long as I have been working as an Associate Safety Engineer for Cal/OSHA. While I have not made it to any in-person events and meetings, I am hoping to get more involved in the organization to meet safety professionals with similar passions and forward-thinking innovative mindsets like me. I have been closely following all of the developments and I genuinely want to be involved in the Orange County Section to make a meaningful impact for safety professionals within our region. Our work is always in high demand and is a true team effort and PEEG has provided me with new ways to get involved in my safety professional field that I otherwise had not done in my previous safety management and leadership experience in the private sector. I am a committed PEEG member who thinks outside of the box and truly wants to make a positive difference in the livelihoods, safety and security for the workforce of California.

I have been a passionate hard working safety professional for a solid 14 years' experience in combined private and public sectors. I am seeking to gain valuable experience with PEEG and all the great opportunities afforded through the organization in this role. I feel very blessed and lucky to be able to serve the State of California to protect worker health and safety. I look forward to making a meaningful impact with PEEG by playing more of an active role in the happenings of PEEG Orange County Section to meet talented safety engineer professionals who have similar forward-thinking mindsets to meet goals and promote PEEG priorities. Previously I served as Safety Chair & Safety Board Member with Industrial Environmental Coalition of Orange County from 2019-2022 making a meaningful impact to boost awareness of importance for employers to be in compliance with Cal/OSHA regulations. I intend to bring that same success to represent safety engineers serving in PEEG Orange County Section.
